

Unified platform for the industry to publish bills & broadcast messages

- ❖ Enput is a free tool which will revolutionise the way energy industry (MOPs, MAPs, DC, DA, DNOs, LCCCC, NG, Elexon, Ofgem etc.) publish their bills and send key messages from a single portal
- ❖ It will take away countless hours of sending hundreds of bills over emails. They can simply dump all the bills at one place for distribution
- ❖ They can broadcast messages or industry changes to the right employee at the supplier organisation without having to update their contact list manually and regularly
- ❖ Tickets raised by the suppliers, can be resolved on the same dashboard
- ❖ DNOs can share available capacity of HH CT meters with suppliers and inform about any changes in capacity on the same single platform

Benefits

1. Free tool to automatically send bulk bills to a single folder rather than sending tons of different emails
2. No setup fee - increase your margins and customer satisfaction
3. In case of an invalid bill, send a corrected bill / credit note
4. Send query clarification to get the bill approved
5. No manual intervention for publishing bills; save resources, efforts and costs
6. Single portal access
7. Efficient workflows
8. Choose relevant, updated list of receivers to send key messages
9. Choose and create message templates to save time and efforts
